OPNAV NOTICE 03110

From: Chief of Naval Operations
To: Distribution List

Subj: Allowance and Location of Navy Aircraft (U)

Ref: (a) OPNAV INST 03110.1A (Navy Aircraft Program (Gray Book))
(b) OPNAV INST 5442.2B (Navy Aircraft Accounting System)
(c) BUWEPS INST 13100.7

1.(U)Purpose. To indicate the following by units (Table 1).

- a. The operating aircraft allowance.
- b. The actual on-hand aircraft inventories as of 31 May 1966.
- c. The planned assignments of operating aircraft.

2.(C) General Instructions.

a. This Notice establishes unit operating allowances of the Navy Aircraft Program within each major operating command. The allocation of Navy aircraft by model is reflected in reference (a), which establishes the allocations for major operating commands, in accordance with the approved planning factors and available inventory. In those instances where apparent inconsistencies occur between operating allowances and allocation, reference (a) shall be the controlling instruction, since it represents the planned implementation of the aircraft program for which Congress approved and provided funds. Actual on-hand aircraft inventories are developed by reference (b). The Naval Air Reserve Training Command, as shown herein, has been established as a major command for aircraft logistics purposes only.

b. If the allowances set forth are not deemed suitable for the mission which an activity or command must support, the Chief of Naval Operations will consider recommendations for changes in models and allowances of aircraft. However, any requests for such changes that would result in an increase in a major command's total aircraft operating allowance, should contain that command's recommendation for a compensatory reduction.

c. Major operating commands are authorized to shift operating assignments (Table 1) from one unit to another on a temporary basis; however, if it is expected that this shift will exceed three months, the Chief of Naval Operations shall be requested to change the authorized operating allowance (Table 1).

d. Specific assignment of aircraft to individual officers is prohibited by the Secretary of the Navy. Aircraft for shore-based activities not listed in Table 1 are provided within the allowance of Naval Air Bases, the Naval Air Reserve Training Command, the Naval Air Training Command, the Naval Air Systems Command (RDT&E).

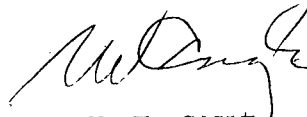

e. Designation of aircraft listed herein are in conformance with reference (c).

GROUP 3 - Declassify on 31 May 1971.

DECLASSIFIED

f. Planned operating levels of target drones (capable of carrying a pilot) are contained in reference (a).

3.(U) Cancellation. This Notice is cancelled and may be destroyed by burning when the next issue is received. For record purposes, cancel 30 September 1986.

GENERAL

The Navy Program aircraft inventory is presented herein in three arrangements:

TABLE 1 is by type of reporting custodian within each command showing, for each unit and model of aircraft, location, authorized operating allowance, and actual inventory.

TABLE 3 is a summary of the actual operating inventory by major commands for each class, configuration and model in the program.

TABLE 4 is in alphabetic order of geographic location except that carriers and other ships are listed first showing for each location the "reporting custodians" or "unit" based there, the total aircraft in custody of each, and a code designation of their respective "command". The column headed Command contains their code designations, which are translated as follows:

- 10 LANT Atlantic Fleet (Navy)
- 11 LANT Atlantic Fleet (Marine Corps)
- 20 PAC Pacific Fleet (Navy)
- 21 PAC Pacific Fleet (Marine Corps)
- 30 NABS Naval Air Bases (Navy)
- 31 NABS Naval Air Bases (Marine Corps)
- 40 NABTC Naval Air Basic Training Command
- 40 NAATC Naval Air Advanced Training Command
- 40 NATTC Naval Air Technical Training Command
- 52 NART Naval Air Reserve Training Command
- 70 RDT&E Research, Development, Test and Evaluation
- 80 NASC Fleet Support, NASC

The above classifications are for logistic purposes and statistical convenience and in no way alter any organizational structure or military command established elsewhere by the Navy.

MISCELLANEOUS		NOTES:							
Bailment (Note 4)	Test Aircraft . TJ	1 A "B number" or "C number" status means that the aircraft could be changed to an operating (A number) status without undergoing Standard or Special Rework. The second character of the B number and C number code shall be selected to indicate the primary use of the aircraft when it is next assigned to Operating.							
	Test Support Aircraft . TK	2 Use status code BA, BB, BC, BD or BE to indicate an aircraft in the "First delivery" process which has a discrepancy pending completion, modification or installation work to be performed by NASC FS.							
	Contract Pending . TR	3 Storage aircraft retained for future drone conversion will be indicated by the addition of code letter "K" to the appropriate storage status code. Example - Code "MK" would indicate a flyable, undamaged aircraft not completed service life, standard rework required being held in reserve stock retention category for Future Conversion to Drone configuration. "IMPORT-ANI" - In the absence of specific instructions from NAVAIRSYSCOM as to retention category, code all Reserve/Retention aircraft to reflect Stored, SLNC."							
Loan (Note 4)	By the Navy	4 CNO approval is prerequisite before change to a Bailment or Loan status.							
	Not RDT&E U	5 Status code "V letter" will be used to indicate that the aircraft has been accepted provisionally or under special conditions pending completion of work by the air frame contractor. Use code VN, VP, VQ, VR or VS to indicate the major area of discrepancy as airborne equipment, electronics, armament, photo equipment or power plant respectively.							
	Test Aircraft UJ	6 Status code BY may be used on aircraft in the reporting custody of an operating command to reflect RFI aircraft in the physical possession of a NAVAIRSYSCOM activity.							
	Test Support Aircraft UK	7 NASC FS custodians shall never report aircraft in status codes A1 through AK or B1 through BK.

STATUS OF NAVY AIRCRAFT INVENTORY

SCOPE OF SECTION II

Navy aircraft "inventory" is comprised of all aircraft which have been accepted, but not stricken, by the Navy. An aircraft is accepted when legal custody is assumed by the Navy, and is stricken when officially separated from Navy custody by the signature of the Deputy Chief of Naval Operations (Air) to the monthly notice "Separations From and Reinstatements To the Navy List of Aircraft."

Navy aircraft are presented under three basic classifications: STATUS, KIND OR CLASS and CONFIGURATION and CUSTODY. "Status" refers to the classification of the functional employment or condition of aircraft; that is, generally, either undergoing, awaiting, or enroute to either operating, standard rework, special rework, storage, final disposition, or evaluation to determine next action. "Kind or Class and Configuration" refers to physical characteristics; as to general mission purpose of Navy aircraft design, e.g., fighter, attack, patrol, transport, etc. "Sub-Class" refers to the next lower level of classification into more specific mission purpose of design, e.g., all-weather, photographic, etc. "Custody" refers to organizational location; that is, administrative control of assignment, pipeline, and employment of aircraft; and, responsibility to account for and otherwise provide information about aircraft.

Included in Section II are selected inventory statistics for all Navy aircraft except guided missiles. (Aircraft on loan to Navy are included in tables 5 and 13, but are excluded from all others in Section II.) Succeeding tables and listings represent successive breakdowns, in varying degree of detail, of current TOTAL INVENTORY.

GLOSSARY OF TERMS (AIRCRAFT)

- TOTAL INVENTORY - all man-carrying Naval aircraft (including man-carrying drones) in the custody of all Navy and Marine organizations and units which have been accepted but not yet stricken. Total inventory may be divided into Program and Non-Program categories.
- PROGRAM AIRCRAFT - all production aircraft in the physical custody of Navy and Marine units for which current or future operation within an authorized allowance is intended or can reasonably be expected. Stated differently, the program category includes operating, pipeline and stored, service life not complete.
- NON-PROGRAM AIRCRAFT - all aircraft of project development and service test (BIS) configuration, target drones (man-carrying), aircraft retired but not yet stricken (including contingency reserve), and aircraft on loan or on bailment contracts.
- OPERATIONAL AIRCRAFT - all program aircraft in the controlling custody of the operating commands (COMNAVAIRLANT, COMNAVAIRPAC, CNATRA, CNARESTRA, NABS, and NASC RDT&E) i.e., operating and operational pool aircraft.
- OPERATING AIRCRAFT - all aircraft in the custody of designated units for flight in performance of a Navy mission therefor, in accordance with, and in direct assignment against OPNAV planned operating assignments. Operating aircraft may be further classified by primary mission of unit having custody - "Combat," "Direct Combat Support," "Indirect Combat Support," "Air Training" and "Reserve (USNR-USMCR) Training."
- PAR AND OPERATIONAL PIPELINE - are non-operating aircraft in custody of the operating command, i.e., aircraft in support of the operating program. These aircraft are often further classified as between "Ready For Issue" (those new or newly reworked aircraft awaiting issue to an operating unit) and "Not Ready For Issue" (aircraft in process of rework or return to NASC).
- NON-OPERATIONAL SUPPORT - aircraft are those in custody of NASC (Fleet Support) for purposes of rework.
- STORED, SERVICE LIFE NOT COMPLETE (Stored, SLNC) - aircraft with service life remaining but currently inactive and being held in storage (formerly, Reserve Stock).
- CONTINGENCY RESERVE - aircraft are those which have been retired from the program inventory as a consequence of completion of standard service life but which have been retained in the inventory to alleviate mobilization deficiencies. Only those aircraft are retained in contingency reserve for which spare part support is available for at least one more Standard Rework and one more service tour/period.
- STORED, SERVICE LIFE COMPLETE (Stored, SLC) - completed service life aircraft being retained in storage (also known as Contingency Reserve).
- ACTIVE AIRCRAFT - operating aircraft and aircraft currently engaged in logistic support of operating aircraft.
- INACTIVE AIRCRAFT - non-program and Stored, Service Life Not Complete (Stored, SLNC) aircraft.
- FUTURE DRONE CONVERSION - non-program aircraft in a Storage Facility selected for drone conversion.
- LOCATION - data are shown by location in tables 1 and 4. Location refers to the physical location, at month end, of the unit having reporting custody of the aircraft.
